**BACK TO NATURE  
IN JUST 8 WEEKS**

Compostable, renewable and robust, bagasse is a natural by-product of sugar production. We use it for many ecoecho™ products. Importantly, it not only offers minimal environmental impact, it also performs impressively: it is suitable for both warm and cold meals. Once composted, it turns to soil in just 8 weeks.

### BACK TO NATURE IN JUST 8 WEEKS

Compostable, renewable and robust, bagasse is a natural by-product of sugar production. We use it for many ecoecho™ products. Importantly, it not only offers minimal environmental impact, it also performs impressively: it is suitable for hot-fills, microwaves and freezers. Once composted, it turns to soil in just 8 weeks.

# OUR PAPER PLATES ARE FSC<sup>®</sup>-CERTIFIED & MADE OF VIRGIN FIBRES.
